Product Brief

Optivity Network Management System

Features and Benefits

- **Simplified Displays** of logical and physical infrastructure provide an intuitive interface that maximizes network manager productivity.
- **Automatic Fault Notification** sends alerts to network managers by e-mail, pager, pop-up window, audible alarm, or any action that can be triggered by a customized script.
- **Protocol Visualization** provides graphical representations of routing and multicast protocols making it significantly easier to manage these complex protocols.
- **Management of Frame Relay** networks is simplified through easy-to-use graphical and statistical information.
- **RMON** statistical data allows network managers to proactively monitor the health of their network.

Optivity* Network Management System is designed to bring streamlined, comprehensive, cost-effective management to enterprise network environments. Optivity Network Management System uses the powerful synergy between Web-enabled component applications and industry-leading device management tools to deliver a system-level perspective on network operations.

Based on a client/server architecture, the software solution enables users to access any Optivity Network Management System server in the network from one client installation. This distributed approach provides access to key management tools from any Web-enabled workstation.

Optivity Network Management System provides the integration for managing networks that are increasingly faster and more complex. The industry-leading solution for managing next-generation environments, Optivity Network Management System enables management personnel to monitor and manage their network through a single view. Optivity Network Management System is a member of the Optivity family of network management products. These products can either be used individually or combined together for greater value. Organizations depend on the Optivity family of products to help them increase their productivity and to reduce their total cost of ownership.
